

Field assembly

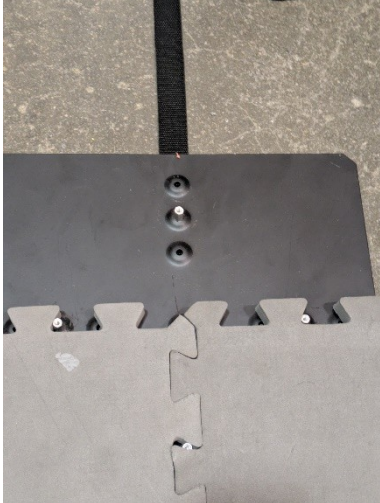

Center of strap is marked with white tape, A red x is on side that be up (Velcro ends down)

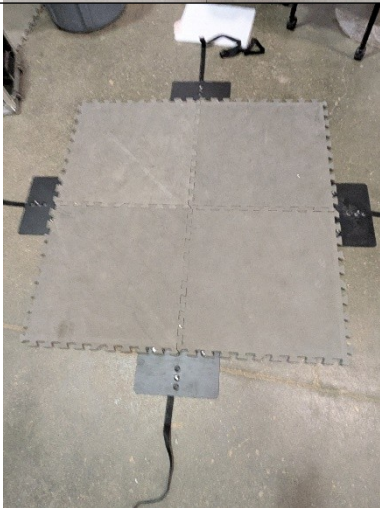

Teeth of the floor tile line up with the straps. If a tile is missing a tooth, use it for the outside edge.

Set the 4 middle tiles in place

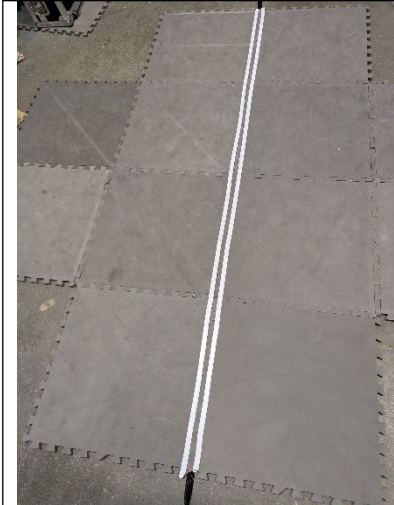

Place the plate under the tile and line up with intersection. Make sure the strap is in the middle of the plate

Place the other 3 plates.

Continue building the field. 6x6.

Apply tape to the center tiles audience view to Referee view. Tape on the outside edge of the tile teeth.

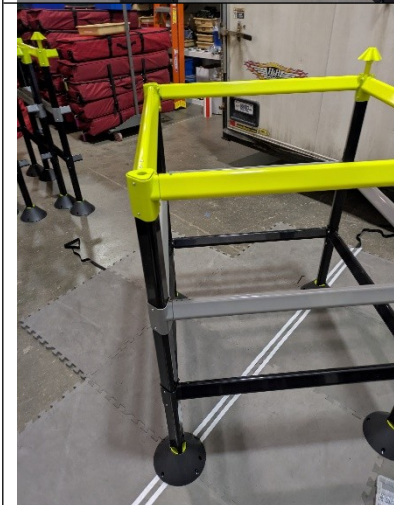

Secure the 1 ladder half to the field plates. Make sure the high stake it toward the audience. Use $\frac{1}{4}$ inch screws

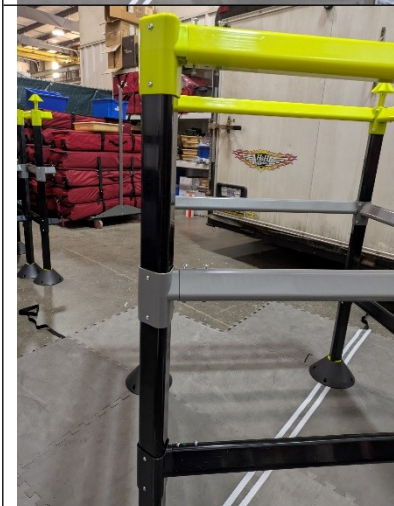

Add the rungs to the ladder half that is secured to the floor

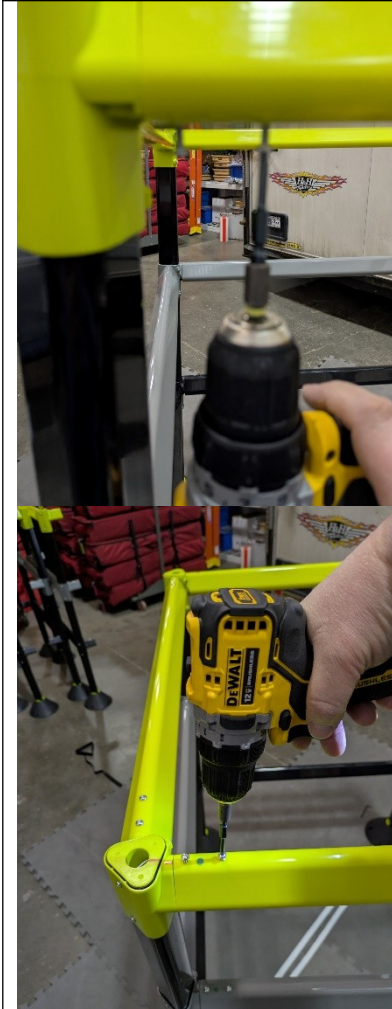

Line up the 2nd half of the ladder to the rungs

Secure the ladder to the floor plate. Use **1/4 inch screws**

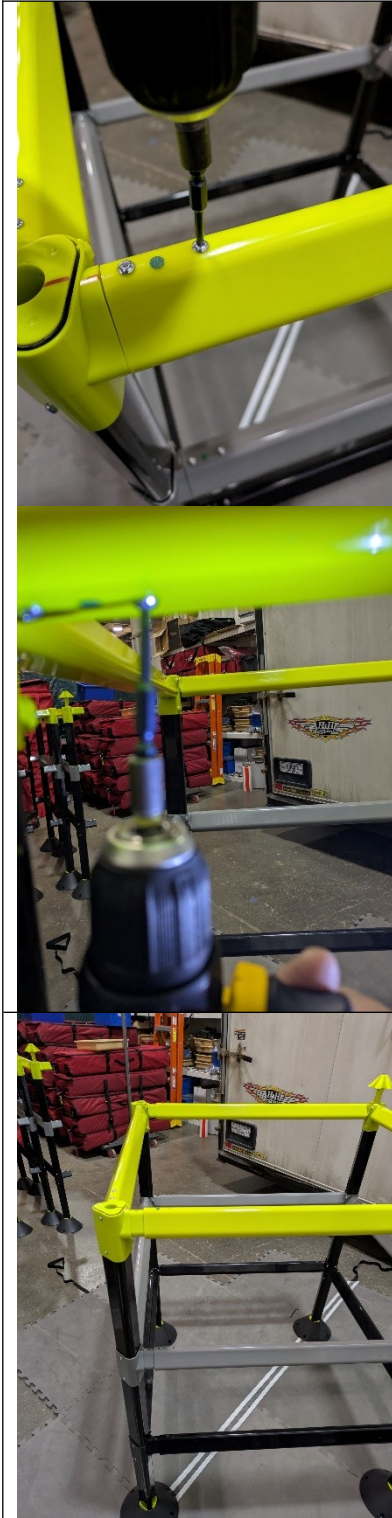

Add screws to top and bottom of all rungs on one side. This allows for easy assembly. Use **7/8 Screws**

Tighten
bottom
then
top

Tork setting 3.
This can be done 1 rung at a time.

Disassembly

on rungs with green dots
